

SIVAKUMAR M

React Native Developer | Cross-Platform Mobile Applications

sivakumarmariappan30@gmail.com | +91 93607 63552 | Sivakasi, Tamil Nadu, India
Portfolio: [sivakumar-dev.vercel.app](#) | LinkedIn: [linkedin.com/in/siva-kumar-m-594a09238](#)

PROFESSIONAL SUMMARY

React Native Developer with 3+ years of experience building and shipping cross-platform mobile applications used by thousands of end users. Skilled in native module integration, complex state management, navigation architecture, and mobile performance optimization across the full app lifecycle — from design to deployment. Working knowledge of Node.js and REST API development enables close collaboration with backend teams. Known for debugging deep platform-level issues and delivering reliable, production-ready apps for Android and iOS.

TECHNICAL SKILLS

Mobile Development: React Native, React Navigation, Native Modules, Reanimated, React Native Blur, React Native Linear Gradient, React Native SVG, EAS Build, Expo, Android Development, iOS Development, Cross-Platform Mobile Development

State Management: Redux, Redux Toolkit, Context API, MobX

Frontend Development: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI Design

Backend Development (Node.js): Node.js, Express.js, RESTful API Design & Integration, API Security, JWT Authentication, Middleware Development

Database Management: MongoDB, Mongoose, MySQL, SQL, Redis, Firebase, Database Schema Design

Tools & Platforms: Git, GitHub, Android Studio, Xcode, VS Code, Postman, AWS (S3, EC2, CloudWatch), CI/CD Fundamentals, Jest, Unit Testing, API Validation, JavaScript, TypeScript, Core Java, C

PROFESSIONAL EXPERIENCE

Associate Software Developer - MitrahSoft, Kovilpatti

October 2023 - Present

- Build and maintain React Native features across navigation, state management, and native module integrations for an enterprise conference/event platform used by thousands of attendees
- Redesigned the app's navigation system using a dynamic, ID-based screen resolution approach, replacing hardcoded configuration and making it easier to add new screens
- Fixed a recurring active-tab display bug by tracing it to an outdated state reference and rebuilding the logic to read directly from navigation state
- Debugged and resolved native module crashes and rendering issues across Android and iOS, including tablet scaling and SVG rendering problems
- Designed and implemented secure REST API endpoints, authentication flows, and role-based access control using Node.js and Express
- Collaborated with Agile, cross-functional teams to plan sprints and ship consistent production releases, using AI-assisted tools to speed up development

KEY PROJECTS

Conference Management System

Tech Stack: React Native, Node.js, Express.js, TypeScript, MongoDB, Redis, JWT, REST APIs, AWS

- Built a full-stack event management platform for real-time scheduling, session tracking, and participant management, supporting large-scale conferences with thousands of attendees, backed by 20+ REST API endpoints
- Redesigned core navigation using a dynamic, ID-based screen resolution system, replacing hardcoded configuration across the app's side menu, home screen, and search
- Added camera-based QR check-in with offline sync support, cutting attendee check-in time by ~40%
- Fixed cross-cutting bugs in the social feed, chat, and notifications (emoji rendering, timestamp handling, crash issues) to stabilize the app after the navigation migration
- Optimized MongoDB schemas and introduced Redis caching, improving data retrieval speed by up to 25% and reducing database load during real-time updates
- Strengthened security with JWT authentication and role-based access control, cutting API errors by ~30%

AI-Powered Expense Tracker Application

Tech Stack: React Native, Firebase, Reanimated, React Navigation, Node.js, Jest, EAS Build, AI/NLP Integration

- Built a personal finance app from scratch with AI-powered natural-language expense entry, budgeting tools, receipt scanning, and financial analytics
- Integrated a voice-to-text feature using a native module in a bare React Native CLI setup, manually configuring native permissions without prebuilt config plugins
- Designed a custom animated "liquid glass" tab bar using native blur effects, gradients, and smooth spring animations
- Built a complete dark, glass-morphism UI system, including an AI-powered summary card and a search feature with real-time filtering and highlighting
- Implemented React Navigation and improved app load time by ~35% through memoization and lazy loading
- Ensured release quality with Jest unit testing and automated iOS/Android deployment via EAS Build

KEY ACHIEVEMENTS

- Delivered production-ready mobile applications adopted by thousands of end users, maintaining reliability under real-world scale
- Resolved complex native module, state management, and cross-platform rendering issues to improve app stability on Android and iOS
- Extended product functionality with push notifications, digital wallet integration, and AI-assisted query resolution via WebView
- Applied performance-focused practices — memoization, lazy loading, caching, and custom native animations — to keep mobile apps fast and responsive

EDUCATION

B.E., Computer Science & Engineering - K.L.N College of Engineering, Pottapalayam

2019 - 2023 | CGPA: 8.5

HSC - Kalaimagal Hr. Sec. School, Thiruthangal | 2018 - 2019 | 83.17%

CERTIFICATIONS & ACTIVITIES

- Certified in C and C++ Programming
- Completed a three-day Cyber Security workshop conducted by Sankar Raj Subramanian, CEO, Prompt InfoTech
- Certified Training, Microsoft Dynamics 365 Business Central - Great Innovus Company
- Awarded highest marks in Mathematics, 12th Board Examination

LANGUAGES

English, Tamil (Read, Write, Speak)
