

SIVAKUMAR M

React Native Developer | Full Stack Engineer

sivakumarmariappan30@gmail.com | +91 93607 63552 | Sivakasi, Tamil Nadu, India
Portfolio: [sivakumar-dev.vercel.app](#) | LinkedIn: [linkedin.com/in/siva-kumar-m-594a09238](#)

PROFESSIONAL SUMMARY

React Native Developer with 3+ years of experience architecting and shipping production-grade cross-platform mobile applications for enterprise clients and end users at scale. Deep hands-on expertise in native module integration, complex state management (Redux, MobX, Context API), navigation architecture, and mobile performance optimization, backed by working knowledge of Node.js/Express for full end-to-end ownership. Comfortable debugging deep platform-level issues across Android and iOS and collaborating within Agile, cross-functional teams.

TECHNICAL SKILLS

Mobile Development: React Native, React Navigation, Native Modules, Reanimated, React Native Blur, React Native Linear Gradient, React Native SVG, EAS Build, Expo, Android Development, iOS Development, Cross-Platform App Development

State Management: Redux, Redux Toolkit, Context API, MobX

Frontend Development: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI Design

Backend Development: Node.js, Express.js, RESTful API Design, API Security, JWT Authentication, Middleware Development

Database Management: MongoDB, Mongoose, MySQL, SQL, Redis, Firebase, Database Schema Design

Cloud & DevOps: AWS (S3, EC2, CloudWatch), CI/CD Fundamentals, Version Control (Git & GitHub)

Testing & Quality: Jest, Unit Testing, API Validation

Programming Languages: JavaScript, TypeScript, Core Java, C

Tools & Platforms: Git, GitHub, Android Studio, Xcode, VS Code, Postman

PROFESSIONAL EXPERIENCE

Associate Software Developer - MitrahSoft, Kovilpatti

October 2023 - Present

- Own core React Native features across navigation, state management, and native module integrations for an enterprise conference/event platform used by thousands of attendees
- Led a navigation architecture migration from embedded config structures to a screen-ID-based resolution pattern across the app's side navigation, home lobby, and global search, improving maintainability and enabling dynamic screen registration
- Diagnosed and fixed a recurring active-tab UI bug by tracing it to a stale MobX store value and re-deriving tab state directly from navigation state, eliminating a class of navigation-state bugs
- Resolved native module crashes and cross-device rendering issues (tablet scaling, multi-path SVG rendering, image-handling crashes) to improve app stability across Android and iOS
- Designed and implemented secure API endpoints, authentication flows, and role-based access control in Node.js/Express to support mobile features
- Partnered with Agile, cross-functional teams to plan sprints and ship consistent production releases, using AI-assisted development tools to speed up delivery while maintaining code quality

KEY PROJECTS

Conference Management System

Tech Stack: React Native, Node.js, Express.js, TypeScript, MongoDB, Redis, JWT, REST APIs, AWS

- Built a full-stack event management platform enabling real-time scheduling, session tracking, and participant management for large-scale conferences with thousands of attendees, backed by 20+ well-structured API endpoints
- Migrated core app navigation to a dynamic, screen-ID-based architecture with async screen resolution and caching, replacing hardcoded config across side navigation, home lobby, and global search
- Added Native Module-based camera access for QR check-in and offline sync, cutting attendee check-in time by ~40%
- Fixed cross-cutting bugs across the social feed, chat, and notification systems (emoji rendering fallback, timestamp conversion errors, modal crashes) to stabilize the app through a major migration
- Optimized MongoDB schemas and query patterns to improve data retrieval speed by up to 25%, while introducing Redis caching to ease database load for real-time session updates
- Strengthened security with JWT authentication and role-based access control, reducing API errors by ~30%

AI-Powered Expense Tracker Application

Tech Stack: React Native, Firebase, Reanimated, React Navigation, Node.js, Jest, EAS Build, AI/NLP Integration

- Built a personal finance app from the ground up with AI-powered natural-language expense parsing, budgeting tools, receipt scanning, and financial analytics
- Integrated a voice-to-text native module into a bare React Native CLI environment, manually wiring native permissions and autolinking without config plugins
- Designed a custom "liquid glass" tab bar using native blur, linear gradients, and Reanimated shared values for a spring-animated sliding indicator
- Built a full dark glass-morphism UI system, an AI-powered summary card with dual layout templates, and a search bar with filtering and inline highlighting
- Implemented React Navigation for streamlined app routing and improved load time by approximately 35% through memoization and lazy loading
- Ensured release quality with Jest unit tests and automated iOS/Android deployments via EAS Build

KEY ACHIEVEMENTS

- Delivered production-ready mobile applications adopted by thousands of end users, maintaining reliability under real-world scale
- Resolved complex native module, state management, and cross-platform rendering bugs to improve app stability across Android and iOS
- Extended product functionality with push notifications, digital wallet integration, and AI-assisted query resolution via WebView
- Applied performance-focused engineering practices, including memoization, lazy loading, caching, and custom native animations, to keep mobile

experiences fast and responsive

EDUCATION

B.E., Computer Science & Engineering – K.L.N College of Engineering, Pottapalayam
2019 – 2023 | CGPA: 8.5

HSC – Kalaimagal Hr. Sec. School, Thiruthangal | 2018 – 2019 | 83.17%

SSLC – Kalaimagal Hr. Sec. School, Thiruthangal | 2016 – 2017 | 94%

CERTIFICATIONS & ACTIVITIES

- Certified in C and C++ Programming
- Completed a three-day Cyber Security workshop conducted by Sankar Raj Subramanian, CEO, Prompt InfoTech
- Certified Training, Microsoft Dynamics 365 Business Central – Great Innovus Company
- Awarded highest marks in Mathematics, 12th Board Examination

LANGUAGES

English, Tamil (Read, Write, Speak)
