

SIVAKUMAR M

Full Stack Developer | React Native Developer

sivakumarmariappan30@gmail.com | +91 93607 63552 | Sivakasi, Tamil Nadu, India

Portfolio: [sivakumar-dev.vercel.app](#) | LinkedIn: [linkedin.com/in/siva-kumar-m-594a09238](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building cross-platform mobile applications and scalable backend services using React Native and Node.js. Skilled in designing secure, high-performance API endpoints, applying foundational system design principles, and shipping production-ready applications used by thousands of users. Adept at improving application efficiency and collaborating within Agile, cross-functional teams across the full development lifecycle.

TECHNICAL SKILLS

Mobile Development: React Native, React Navigation, Native Modules, EAS Build, Expo, Android Development, iOS Development, Cross-Platform App Development

Frontend Development: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI Design

State Management: Redux, Redux Toolkit, Context API, MobX

Backend Development: Node.js, Express.js, RESTful API Design, API Security, JWT Authentication, Middleware Development

Database Management: MongoDB, Mongoose, MySQL, SQL, Redis, Database Schema Design

Cloud & DevOps: AWS (S3, EC2, CloudWatch), CI/CD Fundamentals, Version Control (Git & GitHub)

Testing & Quality: Jest, Unit Testing, API Validation

Programming Languages: JavaScript, TypeScript, Core Java, C

Tools & Platforms: Git, GitHub, Android Studio, Xcode, VS Code, Postman

PROFESSIONAL EXPERIENCE

Associate Software Developer – MitrahSoft, Kovilpatti

October 2023 – Present

- Collaborate across the full stack to design, build, and maintain cross-platform mobile applications and backend services for enterprise clients
- Design and implement secure API endpoints, authentication flows, and role-based access control to safeguard user data across multiple products
- Architect and optimize database schemas and caching strategies to support scalable, high-performance applications under growing user load
- Apply foundational system design principles to structure modular services, integrations, and real-time data flows
- Partner with Agile, cross-functional teams to plan sprints, review deliverables, and ship consistent production releases
- Use AI-assisted development tools and native mobile integrations to speed up delivery while maintaining code quality

KEY PROJECTS

Conference Management System

Tech Stack: React Native, Node.js, Express.js, TypeScript, MongoDB, Redis, JWT, REST APIs, AWS

- Built a full-stack event management platform enabling real-time scheduling, session tracking, and participant management for large-scale conferences with thousands of attendees, backed by 20+ well-structured API endpoints

- Optimized MongoDB schemas and query patterns to improve data retrieval speed by up to 25%, while introducing Redis caching to ease database load for real-time session updates
- Added Native Module-based camera access for QR check-in and offline sync, cutting attendee check-in time by ~40%, and strengthened security with JWT authentication and role-based access control, reducing API errors by ~30%

AI-Powered Expense Tracker Application

Tech Stack: React Native, React Navigation, Node.js, Jest, EAS Build, AI/NLP Integration

- Developed an AI-powered personal finance app with natural-language expense entry, budgeting tools, and financial analytics for end users
- Implemented React Navigation for streamlined app routing and improved load time by approximately 35% through memoization and lazy loading
- Ensured release quality with Jest unit tests and automated iOS/Android deployments via EAS Build

KEY ACHIEVEMENTS

- Delivered production-ready applications adopted by thousands of end users, maintaining reliability under real-world scale
- Extended product functionality with push notifications, digital wallet integration, and AI-assisted query resolution via WebView
- Applied performance-focused engineering practices, including memoization, lazy loading, and caching, to keep mobile experiences fast and responsive

EDUCATION

B.E., Computer Science & Engineering – K.L.N College of Engineering, Pottapalayam

2019 – 2023 | CGPA: 8.5

HSC – Kalaimagal Hr. Sec. School, Thiruthangal | 2018 – 2019 | 83.17%

SSLC – Kalaimagal Hr. Sec. School, Thiruthangal | 2016 – 2017 | 94%

CERTIFICATIONS & ACTIVITIES

- Certified in C and C++ Programming
- Completed a three-day Cyber Security workshop conducted by Sankar Raj Subramanian, CEO, Prompt InfoTech
- Certified Training, Microsoft Dynamics 365 Business Central – Great Innovus Company
- Awarded highest marks in Mathematics, 12th Board Examination

LANGUAGES

English, Tamil (Read, Write, Speak)
