PROFESSIONAL SUMMARY

React Native Mobile Application Developer with 3+ years of experience designing, building and configuring cross-platform mobile applications for Android and iOS, used by thousands of end users. Strong in JavaScript (ES6+) and TypeScript, state management with Redux and MobX, React Navigation architecture, native module integration and REST API integration. Experienced in mobile performance optimization, debugging and troubleshooting production issues, and shipping releases through Agile, cross-functional teams using Git-based version control. Works independently end to end — from requirement gathering and UI implementation to app store deployment and post-release support.

TECHNICAL SKILLS

Mobile Development: React Native, Cross-Platform Mobile Development, Android Development, iOS Development, React Navigation, Native Modules, Reanimated, React Native SVG, React Native Blur, Linear Gradient, Expo, EAS Build, Push Notifications, Offline Support & Caching

State Management: Redux, Redux Toolkit, MobX, Context API

Languages: JavaScript (ES6+), TypeScript, Core Java, C

API & Data: REST API Integration, JSON, JWT-based Authentication Flows, Axios / Fetch, Firebase, Local Storage & Caching, Data Synchronization

Frontend Development: React.js, HTML5, CSS3, Responsive & Adaptive Mobile UI Design, Phone & Tablet Layouts, Component Architecture, Animations

Tools & Platforms: Git, GitHub, Android Studio, Xcode, VS Code, Postman, Jest, Unit Testing, Debugging & Troubleshooting, Performance Optimization, CI/CD Fundamentals, Agile Methodology, Application Documentation

PROFESSIONAL EXPERIENCE

Associate Software Developer – MitrahSoft, Kovilpatti

October 2023 – Present | React Native Mobile Application Development

- Developed and maintained React Native features for an enterprise conference and event platform used by thousands of attendees across Android and iOS.
- Implemented a dynamic, ID-based screen resolution system for app navigation, replacing hardcoded configuration and reducing the effort to add new screens.
- Integrated RESTful APIs for seamless data synchronization between the mobile app and platform services, including authentication and role-based screen access on the client side.
- Optimized mobile performance through memoization, lazy loading and render-cycle profiling, improving screen load responsiveness across low-end Android devices.
- Debugged and resolved native module crashes and cross-platform rendering defects, including tablet scaling and SVG rendering issues on Android and iOS.
- Enhanced state management reliability by rebuilding an active-tab display bug to read directly from navigation state instead of a stale state reference.
- Collaborated with cross-functional Agile teams to gather requirements, plan sprints, document application workflows and ship consistent production releases.

KEY PROJECTS

Conference Management Mobile Application – React Native (Android & iOS)

Tech Stack: React Native, TypeScript, JavaScript (ES6+), Redux, React Navigation, REST API Integration, Native Modules, Reanimated, Push Notifications, Git

- Developed a cross-platform mobile application for real-time conference scheduling, session tracking and attendee management, supporting large-scale events with thousands of users.
- Implemented mobile UI/UX across the home screen, side menu, session agenda, search and profile modules, ensuring consistent behaviour on Android and iOS phones and tablets.
- Redesigned core navigation with a dynamic, ID-based screen resolution architecture, removing hardcoded routes and making new screens configuration-driven.
- Integrated 20+ RESTful API endpoints for seamless data synchronization, managing the resulting data with Redux for predictable state across authentication, agenda and notification modules.
- Developed camera-based QR check-in with offline support and background sync, cutting attendee check-in time by approximately 40%.

- Implemented real-time push notifications, social feed and in-app chat, and troubleshoot rendering, timestamp and crash defects to stabilize production releases.

AI-Powered Expense Tracker Application – React Native

Tech Stack: React Native CLI, Firebase, Reanimated, React Navigation, Native Modules, Jest, EAS Build, AI/NLP Integration

- Built a personal finance mobile app from scratch with AI-powered natural-language expense entry, budgeting tools, receipt scanning and financial analytics.
- Integrated a voice-to-text native module in a bare React Native CLI setup, manually configuring Android and iOS permissions without prebuilt config plugins.
- Designed a custom animated “liquid glass” tab bar using native blur effects, gradients and smooth spring animations.
- Built a complete dark, glass-morphism UI system, including an AI-powered summary card and a search feature with real-time filtering and highlighting.
- Implemented React Navigation and improved app load time by approximately 35% through memoization and lazy loading.
- Ensured release quality with Jest unit testing and automated iOS/Android deployment via EAS Build.

KEY ACHIEVEMENTS

- Delivered production-ready mobile applications adopted by thousands of end users, maintaining reliability under real-world scale.
- Resolved complex native module, state management and cross-platform rendering issues to improve app stability on Android and iOS.
- Extended product functionality with push notifications, digital wallet integration and AI-assisted query resolution via WebView.
- Applied performance-focused practices — memoization, lazy loading, caching and custom native animations — to keep mobile apps fast and responsive.

EDUCATION

B.E., Computer Science & Engineering – K.L.N College of Engineering, Pottapalayam

2019 – 2023 | CGPA: 8.5

HSC – Kalaimagal Hr. Sec. School, Thiruthangal | 2018 – 2019 | 83.17%

SSLC – Kalaimagal Hr. Sec. School, Thiruthangal | 2016 – 2017 | 94%

Total: 15 years of full-time education (10 + 2 + 4-year Bachelor of Engineering).

CERTIFICATIONS & ACTIVITIES

- Certified in C and C++ Programming.
- Certified Training, Microsoft Dynamics 365 Business Central – Great Innovus Company.
- Completed a three-day Cyber Security workshop conducted by Sankar Raj Subramanian, CEO, Prompt InfoTech.
- Awarded highest marks in Mathematics, 12th Board Examination.

LANGUAGES

English, Tamil (Read, Write, Speak)
